VOLUNTARY ANNOUNCEMENT

Chinasoft Launches Three Proprietary Database Derivative Tools: Leveraging Strengths to Expand the Capability Spectrum of GaussDB Database

Chinasoft International Limited (hereinafter referred to as “Chinasoft” or the “Company”) releases this announcement as a voluntary announcement to let the public know the latest information of the Company.

The Company is pleased to announce that it was recently invited to attend the “Huawei Global Intelligent Finance Summit 2023”, where it received the “FPGGP (Financial Partner Go Global Program) Special Contribution Award”. It also participated in the “GaussDB Database Financial Industry Ecosystem Development Plan” and the “Initiative to Promote Database Industry Development”. With the release of Huawei’s new generation distributed database GaussDB, Chinasoft will continue to leverage its professional services and research and development advantages in the database field. It will continually expand the capability spectrum of the GaussDB database, committed to providing its clients with more outstanding digital financial solutions.

The financial industry has always been at the forefront of digital transformation, continuously leading the process of industrial digitization. Traditional centralized architectures in the financial sector face challenges in terms of processing performance, resource expansion, and service launch. Huawei Cloud addresses these bottlenecks with its financial distributed new core. This new core is built on a fully cloud-native foundation, employing the distributed database GaussDB, distributed middleware, and trusted development tools. It features large-scale, high-performance, and high-availability capabilities and has been applied in Huawei’s internal IT systems and

several core business systems across various industries. In the future, GaussDB will focus on financial scenarios. Through comprehensive innovation, it will become a better choice for financial customer databases. It will then expand from the financial industry to other industries with high demands for databases. As it moves from innovative scenarios in China to global customers, GaussDB aims to provide the world with a superior choice.

Chinasoft has had a long-standing collaboration with Huawei in the development of GaussDB database ecosystem products and database testing services. Based on this, Chinasoft has designed and developed three proprietary database derivative tools: an application migration adaptation tool, a database performance testing tool, and a GaussDB database cluster management tool called HouseKeeper. Throughout the GaussDB product collaboration process with Huawei, it has supported and accumulated a comprehensive set of project implementation methodologies, including POC testing, laboratory testing, and online implementation. As Huawei continues to firmly invest in the GaussDB database, Chinasoft will remain dedicated to research and innovation in the database field. It is committed to contributing to the industry's innovation, industrial applications, and ecosystem prosperity.

Chinasoft has been deeply involved in the financial ITS market for decades and has played a significant role in the construction of key national financial informatization projects. It is a leader in various sub-markets such as payment and clearing, transaction banking, risk management, credit operations, and data intelligence. Moreover, it has been pioneers in the digital renminbi and domestication projects. In the future, Chinasoft will keep pace with the development of the financial industry. It will integrate the experiences and technical innovation capabilities of Huawei and its partners in the digital transformation of finance. Together, it will develop industry-leading solutions, expand the global market, enhance the financial technology ecosystem, and achieve mutually beneficial business outcomes.

By order of the Board
Chinasoft International Limited
Dr. Chen Yuhong
Chairman and Chief Executive Officer

Hong Kong, 8 June 2023

As at the date of this announcement, the Board comprises three executive Directors, namely Dr. Chen Yuhong (Chairman and Chief Executive Officer), Dr. He Ning (Vice Chairman) and Dr. Tang Zhenming, two non-executive Directors, namely Dr. Zhang Yaqin and Mr. Gao Liangyu, and two independent non-executive Directors, namely Dr. Lai Guanrong and Professor Mo Lai Lan.
